Welcome to my web accessibility website!

Welcome to my website about web accessibility. This website contains a collection of what I have learned in CMWEB 150 - Web accessibility and usability at Illinois Central College (ICC).

There are six sections to this website. The "What It Means" section gives information and details about what it is to have an accessible website. The "Data Table" page, "Form" page, "PDF" page and "Closed Captions" page give examples of accessible data tables, forms, PDF documents and closed captions in multimedia presentations.

Please feel free to browse around and learn about the wonderful world of accessibility!

-Chris
